Employees treated and discharged 3.5 MG of wastewater at the Cornersville Plant.

Trips/Classes

NA

Pretreatment

Enterprise and Old Hickory Smokehouse were sampled.

Tours/ Visits/Inspections

TDEC inspected Cornersville Wastewater Plant. Report is pending.

6a. Project Update

1. We are ready to start an in-house project in Cornersville. We will replace a 4- inch sewer line on Valley View Road with a new 6-inch PVC line. This line is about 980 feet long and will require 2 new manholes. This will improve the sewer flow through downtown Cornersville. The manholes and pipes are on site at our warehouse. We hope to start this very soon.
2. We are planning and designing a new water main to run along the east side of Cornersville Road, across the street from Fairview market. The old ductile iron pipe is very deep in the ground and has had three line-breaks in the last two years. The last time it failed it had three fist-sized holes in it. We are about to submit our plans to the state for approval.
3. We are working up a plan to replace the sewer pipe and manholes under Mechanico Trail. It is made of clay pipe that has many breaks in it that lets ground water into our sewer system.

Miscellaneous

1. We would like to welcome Axel Vallejos, Nathan Davis, and Logan Walters to our workforce.

Meeting adjourned at 12: 19

Chairman Bill Marsh

Joe Harris
